About

TECH USTAADS
LEARN. CREATE. APPLY.

Techustaads Pro Learning has been conceptualized to narrow down, if not eliminate, the mismatch between the formal education system and the industry. With our Agile-Project Based Learning Approach, we ensure that students not only grasp technology, but also experience software development processes. All our trainers are from the industry and have varied experience working in Startups, competitive Corporates, and Tech Enterprises. We aim to impart the Right Skills and Right Attitude for an excellent career progression through our fast-paced course curriculum.

MISSION

Impart technology training to students and make them industry ready by providing extensive hands-on experiences, and exposure to advanced tools, processes, and projects.

Embibe Professionals Skills and high Ethical Standards in our students.

VISION

To expedite the employability of students by tapping them early in their academic careers and transforming them into masters of their chosen technology stack with strong fundamentals and professional skills.

"TESTIMONIALS"

Komal Gautam
Software Tester

"I think TechUstaads was the right choice for me, this is the best coaching I have ever taken so far in my lifetime, and it's getting better every day. I have confidence in facing testing interviews and learned a lot of new testing vocabulary. Every learner can learn more about definitions from any book but hardly involve in practice what makes us perfect.

Mihir Jadhav
Software Tester

TechUstaads has a good and simple trainer, who tells you what a thing is in testing all about in a non-boring manner. He is just like a friend when he trains us. You have doubts, ask him!, not clear, ask him again, not clear, ask him again, He would be happy to explain to you in a different way until you understand.

Faisal Khan
Software Tester

TechUstaads Training session class was great. The right blend of teaching and practicing what we learn. TechUstaads has a great instructor that balances giving us knowledge and letting us think our way through the problems. Also, he was there to rescue us when we got in over our heads.

"TESTIMONIALS"

Arti Shukla
Software Tester

"TechUstaads has set a bar of expectation that I am not sure other Centers would be able to meet. The faculty was excellent and gave all the guidance required to comprehend the course. I am sure that choosing this class and program will expand my horizon in the future. I'm very thankful for Your efforts, and your professional and kind attitude towards learning and students."
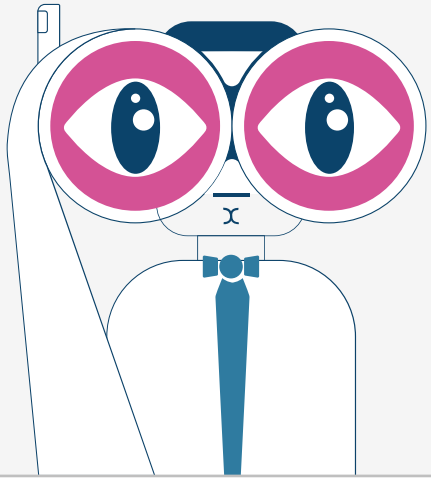

Rosten D'Souza
Software Developer

I enrolled for a Node.js course at TechUstaads. The trainer had excellent knowledge and experience with the technologies that he was meant to train us on. The people in-charge of the institute were also really helpful and encouraging. I was assured of and thereafter provided with placement opportunities as well. It was a great experience and the main catalyst in kick-starting my career as a Software Developer."

Akash Hardade
Flutter Developer

"Genuinely, I would like to thank TechUstaads for helping me with learning Flutter Development, The Guidance by all the teachers, the support staff, and the tech is just perfect to take you through. Thank You TechUstaads for helping make my Career"
